

February 2, 1889

Prof. Seeno Watson,  
Cambridge, Mass.

Dear Sir, -

We have a letter from  
Messrs. John Wilson & Son, University  
Press, in regard to starting work  
on the new edition of the Manual -

We suppose the best plan is to begin  
work as soon as convenient and keep  
it going with uniform pace until it  
is completed. The best time to announce  
the book is in the fall, in good time  
for the winter orders of Jan'y and Feb'y;  
but the work should go ahead and if  
we aim at August we may not do  
better than to hit September or October -

We have written Messrs. Wilson  
& Son in regard to the descriptive  
matter to go with the plates.

Yours truly,

Iverson, Blakeman & Co.
